

Live your life a unique way

## Live your life a unique way with Domia Lifestyle

Welcome to a truly innovative way of living. Pioneering the boundaries of smart home technology, Domia Lifestyle is an ideal way to add value to your property and enhance your way of life.

Programme mood lighting and select music for a special evening wherever you are in your home; minimise your electricity bill by managing the power usage of your devices; control your heating and appliances while watching television; even monitor your home from your favourite spot on the beach via your mobile phone!

Finger tip control over lighting, climate, audio video, appliances, security and surveillance, is only part of the Domia Lifestyle vision – a vision which allows you to control your entire 'digital home' from a central point via a variety of smart interfaces seamlessly.

Delivering intelligent technology for today's living is now within reach of every homeowner thanks to Domia Lifestyle. Flexible, modular and scaleable, Domia Lifestyle provides a fully integrated smart living solution for all building types - from a basic apartment system, through to fully integrated and bespoke high end networks to fit the grandest of properties.

## Live for today...

### Your convenience...

Access and control your digital home, whenever you want, from wherever you are in the world. Control all your devices at the touch of a button via touch screens, web pads, televisions, PCs, Internet and mobile phones.

### Your security...

Keep your home and family safe and secure. Stay informed of what is going on in and around your home while you are away. Receive alerts and images from your home at a remote location.

### Your comfort...

Manage your home entertainment systems from a central point and play chosen media where you are or where you want it. Set lighting scenes to match your mood and activity, and chill out with climate control!

### Your environment...

Save energy, money and the environment by managing the power and energy usage of lights and appliances. Programme your lights to come on only if motion is detected and appliances to power down as you leave for work.

### Your choice...

grow and extend your system as your requirements and budget change with smart, affordable and easily manageable technologies, limited only by your imagination.

After all, it's YOUR lifestyle...

Whatever you want...

Your Domia Lifestyle is made up of a number of core applications which work together to give you central control of your home. Each element that forms part of our Lifestyle solutions offers functionality in one of the following seven key areas:

- Lighting control
- Security, surveillance & home monitoring
- Device control
- Audio video/ entertainment systems
- Climate control (HVAC)
- Access control
- Energy management

Depending on your budget, the size of the property and the scale of the smart home requirement, our installers will work with you to specify the most appropriate combination of software and hardware for your project.

It's your lifestyle...

Affordable

Bespoke

Smart

Innovative

Simple

Flexible

Intuitive

### Lighting Control

- Create powerful lighting effects and programme lighting moods for entertaining – select low level lighting for a movie or something brighter for entertaining.
- Set your home to 'goodnight mode' - switch off and power down all lights and appliances together at the touch of the button to save energy, money and protect the environment.
- Set motion sensors to detect presence in the middle of the night, and switch on low level lighting to guide sleepy children to the bathroom.

### Security, Surveillance & Home Monitoring

- Be alerted to any intrusion while away from home, whether smoke, water or intruder, via a text, image or an email alert.
- Keep an eye on your second home via the Internet or by mobile phone via a network of CCTV cameras and/or webcams.
- Open and close your curtains from a remote location to simulate occupancy.

### Appliance Control

- Automatically turn off the children's music and television at dinner time.
- Set your curtains to open and close and the lights to switch on and off every day at dusk and dawn.
- If you're worried you left the oven on, simply access your home via the Internet or by mobile phone and switch it off remotely.
- Switch your hot tub on as you leave work so it's ready for you to relax when you get home.

### Audio Video/ Entertainment

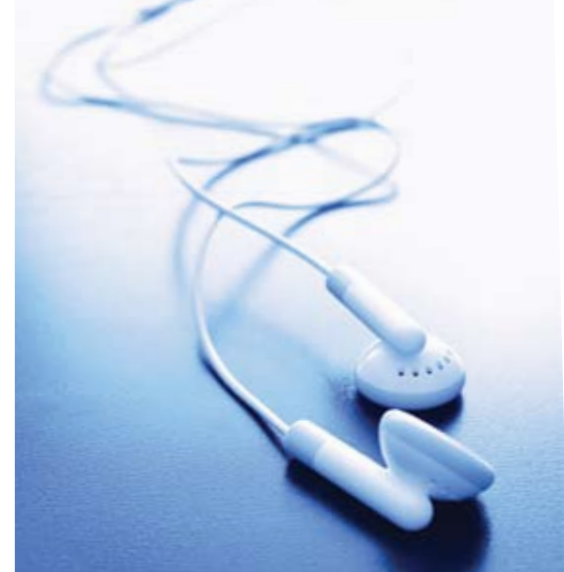

- Browse the cover art of your music collection to select your chosen album with an easy indexing and retrieval system for all of your music.
- Manage audio distribution throughout your home - listen to your music collection in any room of the home.
- Wake up to your favourite track rather than a normal alarm tone.
- Configure simple events to have music come on throughout the house, from pre-determined sources, at desired volume levels for each room.
- Catch up with distant relatives face to face with video communication via Skype or MSN.

### Climate Control

- Monitor and change thermostat settings to automatically adjust your home's temperature based on your family's schedule and lifestyle.
- Set your bedroom temperature to raise automatically an hour before you get out of bed.
- As you step off the plane from a holiday, switch on heating or air conditioning at your property using your mobile.

### Energy Management

- Make your home less expensive to run through sensible energy management and save money off your bills.
- Set your home to power saving mode as you go off to work. A pre-defined 'scene' opens the curtains, turns off the lights and sets the CCTV security and alarm, as well as ensuring that devices in the home are set to power-saving mode.

## Wherever you want it...

Whichever smart functions you wish to include within your Lifestyle solution, Domia's unique range of user-friendly interfaces allows you to control all elements of your entire smart home from one place - either locally or remotely.

You can choose one, some or all of the interfaces below to interact with your system, and there is no limit to the number of the same or different interfaces you can use. Any change in the system is automatically communicated to the other interfaces, ensuring that the true state of your home is reflected to all users at any time.

### Touchscreens

Manage all your systems and devices from an intuitive, easy-to-use wall panel. Configured with stable smart home software, the touchscreen interface is simple to navigate and extremely responsive. The wall mounted version is both a functional and aesthetically pleasing addition to your digital home with its contemporary and sleek design.

### Television / Windows Media Center (Windows Vista & XP)

No need to get up out of your seat. Use your remote control to manage your home through your television. Flick between media screens, device screens and CCTV screens to dim your lighting, monitor who is at the door or simply switch to another DVD from the comfort of your sofa, all at the same time.

### Phone

Wherever you are, be it at work or on holiday Domia Lifestyle allows you to see the status of your home and control it through your mobile, PDA or cell phone. From the airport to the beach - close your curtains or check for any intrusion through this convenient and mobile interface.

### Internet

Manage your home at any time from any remote location with Internet access. A web server allows you to view the status of your home or control any appliance within it while you are away.

### Voice

Voice control is a convenient and fun way to manage your home. Exceptionally simple to use and speaker independent, the system can be used by multiple people within the same household. Set commands such as "Turn lounge lights on" or "Set evening scene" and watch your home respond to your voice.

### PC / Computer

Our Windows based software allows you to easily configure, set up and maintain your digital home. With quick start wizards, full customisation and instant feedback, this install anywhere interface gives you total secure control of your home. Pop it on a USB key and take it anywhere with you.

## A day in the life of Domia Lifestyle...

### 07:00 "Wake up!"

Slowly brightens up the lighting in the room and selects energising music to ease your wake up. Blinds slowly open, boiler kicks into life for a nice warm shower and the kettle boils for an early coffee.

### 08:30 "Ready for work"

At the touch of a button set your home to "away mode" – lighting and appliances are powered down to save energy while you are out and house is secured through central locking and access control system.

### 12:00 "Quick check on the house"

Monitor real time image delivered from your CCTV cameras installed within your home via the internet. Mainly for extra peace of mind, after all if intrusion is detected you'll be informed via a text message.

### 16:00 "Home later than planned"

Set evening lighting to simulate occupancy and delay heating by an hour to save energy.

### 18:00 "Back Home"

And the house knows you are! The oven is now warming for dinner and mood lighting has been set for a special evening.

### 19:30 "Guests Arrive"

Scan through the cover art of your CD collection for appropriate music. Play exactly what you want to play in each room of the house.

### 23:30 "Goodnight"

It's bedtime and at a touch of a button simply "switch off" your house. Courtesy lighting guides you to the bathroom based on motion sensors during the night. Rest easy knowing you are protected by a variety of sensors such as fire, gas and water all controlled via your Domia Lifestyle solution.

## Making a difference...

Domia Ltd is Europe's leading developer of home automation software, hardware and lifestyle systems. Domia's goal is to make home automation flexible, simple and comprehensive by offering a completely integrated lifestyle product range.

The company integrates a vast array of smart applications such as audio & video, lighting, climate control (HVAC), security and surveillance into complete and affordable digital home solutions.

### So what makes us different to other smart home providers?

Because our core software is integrated with existing world class technologies from Microsoft and Intel, we can provide superior and/or unique user interfaces such as Vista MCE, mobile phone and web interfaces.

We offer fast support times and software developed for the international market.

Because we use other people's known technology platforms, our systems require less training to use and are more intuitive than competitors.

Our system is designed in a form that has more modules at a wider variety of price points, so you can customise and grow an entire solution in stages.

Our middleware software is very flexible allowing you to use any equipment, in any system, from any supplier – seamlessly.
