

Domipad 8" Touchscreen

- A simple but highly intuitive user interface
- Controls all Harmony 2007 devices and events
- List and play music from your Media Center
- View multiple CCTV cameras simultaneously
- High brightness display
- Intel PXA 270 based solid state processing
- Added functionality available
- less expensive to run through energy management
- Displays generic and personalised customer information

Domia 8" Intelligent In-Wall Display

The Domia wall mounted 8" LCD combined with an industrial computer capable of displaying static and dynamic information generated from an Ethernet linked server. The system is housed in a black-box that can be sunk into a stud or solid wall, leaving only the bezel protruding. Used in a building for information delivery and interactive communications.

Technical Specification: System

CPU: Processor PXA 270 Intel 312Mhz
I/O: 2 x USB - 1 x RS232
1 x Ethernet 10/100Mbit
Audio: Onboard Audio + Speaker
1 Watt
Memory: 32MB Flash 64MB SDRAM

Technical Specification: Dimensions

In mm: (W) 242 / (H) 170 / (D) 46

Technical Specification: Display

LCD Display: 203.2mm (8")
Resolution: 680 x 480 (VGA)
Brightness: 400 Cd/m²
CR: 250:1
Viewing angle: (LRUD) 65/65/55/65
Viewing area: 162 x 121

Technical Specification: Touch Screen

Technical: 4-wire resistive

Technical Specification: Power

Power Adaptor: Utilizing (POE)
Power Over Ethernet
110 - 240V AC Input (CAT5)
Operating Length up to 100m from Power
Injector

Order Code: DPTS8
