

Domipad 10" Picturetouch

- Battery powered and completely wireless
- It discretely hangs on the wall just like a normal picture
- available in a range of frame colours to suite the décor.
- Insert your own photo or drawing into the picture frame.
- Allows you to control individual X10 devices or use Harmony to trigger macros.

Domia 10" Picturetouch

The Domia 10" Picturetouch is a low cost, highly flexible and fully customisable control panel with possibilities as wide as your imagination. You can decide to create your own background picture of what ever image you like. There is a template available that can guide the positions of the buttons; well as instructions on how to place an image into the picture frame.
